Porcelato is "The New Green Skin for Architecture and Interior Design". Our Porcelato Slim Porcelain tiles are technologically innovative, large plate tile sheets which are fire-proof, moisture-proof, light weight, extremely durable and environmentally friendly, while possessing extravagant quality and fashionable style. Porcelato tile, by weighing up to 1/3 less than traditional ceramic and stone, realizes savings of up to 60% of raw material resources while reducing energy consumption by up to 50%.

Porcelato Slim Porcelain tiles are going to be the revolutionary replacement for traditional tile and cladding materials; our thin, durable, lightweight, large sheet Porcelato tiles are going to be the trend for building exterior & interior.
